

Battery Recycle Program

Your donation of used batteries helps rebuild lives in Niagara!

Every year thousands of used batteries are collected across Niagara Region to keep them out of landfills, but did you know they can also help our community?

To date, **over \$100,000** has been raised to help purchase patient care equipment at Hotel Dieu Shaver. In addition, the recycler in Port Colborne recycles the batteries safely into fertilizer.

By participating in this recycling program in your workplace, or through one of the 115 battery bins located across Niagara Region you are helping to rebuild lives & renew hope for every patient who comes through our doors!

Every Battery Counts!
